### **Membership and Honorary/Professional Societies**

American Medical Association-member  
 American College of Surgeons- member  
 ABS- Board Certification in General Surgery #065090

Robotically trained and an interest in breast surgery (reconstruction, augmentation, reduction)

### **Volunteer Experience**

06/2004-06/2004

University of Michigan Medical School  
 Camp Counselor

Work as one of the lead counselors for the Summer Science Academy, a program for high school students that are interested in careers in the medical field

08/2003-04/2004

University of Michigan Medical School  
 Volunteer

Work with a group called STATS which was a collection of medical students that went to junior high schools to talk about discuss sexually transmitted infections and how to prevent their transmission

04/2000-07/2000

University of Michigan Health System  
 Volunteer

Assist the pharmacists in Mott Children's Hospital at the University of Michigan. Was also able to go on rounds with the pharmacists and interact with the children that were on the wards at the time

## **Research Experience**

07/2009- 6/2011

University of Texas Health Science Center- San Antonio

Post-Doctoral Research Fellow

Perform dedicated research with an academic vascular surgeon at UTHSCSA. This basic science lab studies angiogenesis and muscle regeneration using a murine model

06/2004-08/2004

University of Michigan Medical School

Research Assistant

The Medical School has a summer research program that allows student to participate in clinical research during the summer months between first and second year. The research work I selected was with Dr. Kevin Chung in the Plastic Surgery division at the University of Michigan. The project was to devise a more objective manner of testing hand weakness in patients since a knowledgeable patient can feign the current methods

05/2003-08/2003

Minorities in Research Training Program

Research Assistant

This was a summer research program run through Michigan State University that allowed minorities to conduct research in foreign country. While there, I was hosted by the University of the Philippines-Manila where I helped with preliminary work for more accurate method of detecting Hepatitis B in the Filipino population. I also had the opportunity to help with a project to investigate X-linked Dystonia – Parkinsonism (Lubag) which is a rare genetic form of dystonia found almost entirely among men from the Philippine Island of Panay. I also had the pleasure of participating in several medical missions to the more distant islands during my summer in the Philippines
